BIOCOMPOSTABILE **BICOMPOSTABLE**

Articoli realizzati in **PLA** (acido polilattico), un polimero prodotto da risorse naturali 100% rinnovabili annualmente come il mais, il grano o la barbabietola, e utilizzato per produrre resine simili alla plastica o fibre. Il **PLA** ha ottima resistenza agli oli ed ai grassi ed a numerosi agenti chimici, offre buona barriera agli aromi e all'ossigeno, mentre una bassa barriera al vapore acqueo. Gli articoli in PLA, una volta utilizzati, sono totalmente compostabili e quindi a zero impatto ambientale.
